Progettando il nuovo catalogo abbiamo sentito la necessità di fare un passo in avanti, provando a sorprendere i nostri clienti proponendo una linea coordinata per il mondo bagno, svelando soluzioni inedite. Per far questo, SAMO, ha deciso di fondere l'anima de "l'esperienza italiana della doccia", icona di eccellenza europea con quella di **Lineabeta**, un marchio vivace, dinamico, sinonimo di qualità, rinomato per il suo design accattivante.

Il mio augurio è quello che tu possa sfruttare al massimo l'energia sprigionata da questi due marchi, infondendo al tuo bagno lo stile e il design ricercato che desideravi.

Lineabeta utilizza al 100% energia da fonti rinnovabili

Le Garanzie d'Origine GO sono dei certificati internazionali che vengono riconosciuti a quegli impianti di produzione di energia elettrica che rispettano determinate caratteristiche di sostenibilità ambientale. Nati nel 2009, ad oggi sono lo strumento principale per garantire la tracciabilità dell'energia prodotta e sostengono la promozione e lo sviluppo di un mercato su base volontaria dell'energia pulita prodotta da fonti rinnovabili.
L'obiettivo della certificazione GO è quello di garantire al cliente che una quantità di energia pari a quella da lui consumata sia stata prodotta da impianti alimentati da una fonte rinnovabile ben definita in un determinato periodo di tempo. Mediante l'utilizzo di certificati GO, l'acquirente finanzia l'energia pulita testimoniando il proprio impegno a favore dell'ambiente.

Lineabeta e il mondo GREEN

Un impegno costante nel tempo.
Dopo questo primo exploit nel mondo green, l'impegno di Lineabeta si è indirizzato verso il consumo di energia – per la propria attività produttiva – derivata al 100% da fonti rinnovabili.

A questo impegno fa eco la certificazione CO2 della produzione, e la compensazione dell'impatto nell'ambiente di diossido di carbonio di tutte le attività di marketing del marchio Lineabeta, attraverso l'acquisto di Carbon Credits.
L'impegno a favore dell'ambiente è un cammino che Lineabeta desidera percorrere da protagonista, con la consapevolezza che non ci si può mai sentire "abbastanza" soddisfatti dei propri passi e dei propri comportamenti, a favore di un'economia realmente sostenibile dal nostro amato pianeta.

Lineabeta uses 100% energy from renewable sources

The GO - Guarantees of Origin - are recognized international certificates for electricity production factories that respect certain environmental sustainability characteristics. Established in 2009, they are today the main tool ensuring the traceability of the energy produced and supporting the promotion and development of the market for clean energy produced from renewable resources. The aim of GO certification is to ensure the customer that an amount of energy equal to that which they have consumed has been produced by factories powered by a well-defined renewable source over a given period of time. Through the use of GO certificates, the buyer finances clean energy by demonstrating its commitment to the environment.

Lineabeta and the GREEN world.

A constant commitment over time.
When the commitment to the environment and the eco-sustainability of production activities were making their first stirrings. This commitment is characterized by the CO2 certification of the production of showers, and the compensation of the carbon dioxide impact on the environment of all the marketing activities of the Lineabeta brand, through the purchase of Carbon Credits. The commitment to the environment is a path that Lineabeta wishes to take as a protagonist, while being aware that one is never completely satisfied with his own approaches and behavior, in favor of a truly sustainable economy for our beloved planet.

Lineabeta utilise 100% d'énergie issue de ressources renouvelables

Les Garanties d'Origine GO sont des certificats internationaux attribués aux centrales de production d'électricité qui respectent des caractéristiques déterminées en faveur du développement durable. Mises en place en 2009, elles sont aujourd'hui le principal outil pour garantir la traçabilité de l'énergie produite et pour soutenir la promotion et le développement d'un marché sur base volontariste de l'énergie propre provenant de ressources renouvelables.
L'objectif de la certification GO est de garantir au client qu'une quantité d'énergie égale à celle qu'il a consommée a été produite par des usines alimentées par une ressource renouvelable bien définie sur une période de temps donnée. Grâce à l'utilisation de certificats GO, l'acheteur finance une énergie propre en affirmant son engagement pour l'environnement.

Lineabeta et le monde GREEN.

Un engagement constant dans le temps.
Dès les balbutiements de l'engagement en faveur de l'environnement et du développement durable dans le cadre des activités de production,
A cet engagement se fait écho la certification CO2 de la production des parois de douches, et la compensation de l'impact en dioxyde de carbone sur l'environnement de toutes les activités marketing de la marque Lineabeta, par l'achat de Crédits-carbone. L'engagement en faveur de l'environnement est un chemin que Lineabeta souhaite emprunter en tant que protagoniste, tout en ayant conscience que l'on ne peut jamais se sentir suffisamment satisfait de ses propres démarches et de son comportement, en faveur d'une économie véritablement respectueuse de notre planète bien-aimée.

Lineabeta nutzt 100% Energie aus erneuerbaren Quellen

Die Herkunftsnachweise GO sind internationale Bescheinigungen, die jenen stromproduzierenden Anlagen zuerkannt werden, die bei der ökologischen Nachhaltigkeit bestimmten Eigenschaften genügen. 2009 eingeführt, sind sie heute das wichtigste Instrument, um die Rückverfolgbarkeit der gewonnenen Energie zu gewährleisten. Außerdem fördern sie auf freiwilliger Basis die Entwicklung eines Marktes sauberer, aus erneuerbaren Quellen gewonnener Energie.
Die Zertifizierung GO soll dem Kunden garantieren, dass eine Energiemenge, die der von ihm verbrauchten Menge entspricht, in Anlagen gewonnen worden ist, die in einem bestimmten Zeitraum von einer genau definierten erneuerbaren Quelle gespeist worden sind. Durch die Nutzung von GO-Zertifikaten finanziert der Käufer saubere Energie und bezeugt seinen Einsatz für die Umwelt.

Lineabeta e il mondo GREEN

Ein unaufhörlicher Einsatz.
Sichtbares Zeichen für diese Anstrengungen ist die CO2-Zertifizierung der Duschenproduktion und die Kompensation der Auswirkungen, die Marketingaktivitäten der Marke Lineabeta wegen ihres Kohlendioxidausstoßes auf die Umwelt haben, durch den Erwerb von Kohlenstoffgutschriften (Carbon Credits). Der Einsatz für die Umwelt ist ein Weg, den Lineabeta als Hauptakteur begehen will, in dem Bewusstsein, dass man sich nie zufrieden „genug" über seine Schritte und seine Verhaltensweisen zugunsten einer für unseren geliebten Planeten wirklich nachhaltigen Wirtschaft fühlen kann.

PICOLA

ACCESSORI / Accessories / Accessoires / Accessoires

PICOLA: piccolina, l'ultima nata in famiglia, quella che gode della simpatia e delle attenzioni di tutti gli altri membri.

Una serie discreta, amata in particolar modo dagli architetti. Non "ruba il palcoscenico", ma lascia spazio alle velleità architettoniche di chi progetta la casa e il bagno.

EN

PICOLA: small, the baby of the family, the one who enjoys the sympathy and attention of all the other members.

A discreet range, loved especially by architects. It does not "steal the stage", but leaves room for the architectural ambitions of those who design the house and the bathroom.

FR

PICOLA : petite fille, la dernière arrivée dans la famille, celle qui bénéficie de la sympathie et de l'attention de tous les autres membres.

Une série discrète, particulièrement appréciée des architectes. Elle ne « vole pas la vedette », mais laisse place aux ambitions architecturales de ceux qui décorent les intérieurs et les salles de bains.

DE

PICOLA: die Kleine, die Letztgeborene der Familie, jene, die die Zuneigung und Aufmerksamkeit aller anderen Familienmitglieder genießt.

Eine dezente Serie, die besonders von den Architekten geliebt wird. Sie "stielt nicht die Schau", sondern lässt den architektonischen Ambitionen dessen Raum, der das Haus und das Bad entwirft.

CERTIFICAZIONI

TUV Rheinland GS è un certificato fornito dal produttore che attesta l'ammissione in Europa. Dimostrando la totale conformità con GPSG (legge tedesca sulla sicurezza del prodotto) per la Germania, ma anche dimostra la conformità con l'LVD, legge dell' unione europea che assicura che un apparecchio elettrico con certi limiti di voltaggio, offre comunque un alto livello di protezione.

CLASSI DI ISOLAMENTO

CLASSE I

La protezione non si basa unicamente sull'isolamento principale, ma anche su una misura di sicurezza supplementare costituita dalla connessione delle parti conduttrici accessibili ad un conduttore di protezione (messa a terra di protezione) che fa capo all'impianto elettrico fisso, in modo tale che le parti conduttrici accessibili non possano andare in tensione in caso di guasto dell'isolamento principale.

CLASSE II

Gli apparecchi di classe II sono progettati in modo da non richiedere la connessione di messa a terra. Sono costruiti in modo che un singolo guasto non possa causare il contatto con tensioni pericolose da parte dell'utilizzatore. Ciò è ottenuto realizzando l'involucro del contenitore in materiali isolanti, o comunque facendo in modo che le parti in tensione siano circondate da un doppio strato di materiale isolante o usando isolamenti rinforzati.

CLASSE III

Un apparecchio viene definito di Classe III quando la protezione contro la folgorazione si affida al fatto che non sono presenti tensioni superiori alla Bassissima tensione di sicurezza SELV (Safety Extra-Low Voltage). In pratica tale apparecchio viene alimentato o da una batteria o da un trasformatore SELV.

NORMATIVE TECNICHE

Le direttive 89/336/CEE e 73/23/CEE stabiliscono i requisiti essenziali di sicurezza e compatibilità elettromagnetica a cui devono rispondere i materiali elettrici per poter circolare liberamente all'interno del mercato Europeo. Questi requisiti devono essere verificati mediante opportune prove tecniche e la conformità del materiale deve essere indicata mediante l'apposizione del marchio CE sul prodotto o sul suo imballo. La marchiatura è obbligatoria ed il produttore è direttamente responsabile della rispondenza del prodotto ai requisiti essenziali delle direttive sopraccitate.
La vendita, la commercializzazione e l'acquisto di prodotti privi della marcatura, e quindi non rispondenti alle direttive, è punita a termini di legge.

ZONE DI SICUREZZA

Tutti gli apparecchi elettrici vanno collegati al circuito mantenendo una distanza minima di 0,60 m da lavabi, cabine doccia, vasche e 1,20 m da soffioni doccia.

TÜV CERTIFICATES

The TUV Rheinland GS is a certificate presented by manufacturers as the proof for acceptance into Europe. It demonstrates full compliance with the GPSG (German equipment safety law) for Germany, but it also demonstrates compliance to the LVD that ensures that electrical equipment within certain voltage limits provides a high level of protection in the

CLASS LUMINAIRES

CLASSE I

Provide protection against electrical shock solely using the base insulation and the safe connection of all exposed conductive parts to an earth conductor.

CLASSE II

Provide protection against electrical shock using both the base insulation and an additional or reinforced insulation. This kind of products do not feature a connection to a protective earth conductor.

CLASSE III

Luminaires provide protection against electrical shock by using Safety Extra Low Voltage (SELV). This kind of products are not permitted to generate higher voltages than the Safety Extra Low Voltage.

CE

NORMATIVE NOTES

The directives 89/336/EEC and 73/23/EEC establish the essential requirements for safety and electromagnetic compatibility that the electric and electronic equipment shall comply for freely circulating in the European market. These requirements must be verified by appropriate tests and compliance of the material must be indicated by the CE marking on the product or its packaging. This marking is mandatory and the producer is directly responsible for product compliance with the essential requirements of the abovementioned Directives. The sale, marketing and purchase of products without the markup, and therefore not meet the guidelines, shall be punished by law.

SAFETY ZONES

Electric appliances must be wired to the electric circuit in a minimum distance of 0,60 m from shower cabins, bath tubs, washbasins and
of 1,20 m from shower heads.

CERTIFICATIONS

TUV Rheinland GS est un certificat fourni par le producteur qui atteste l'admission en Europe. En démontrant la totale conformité au GPSG (loi allemande sur la sécurité du produit) pour l'Allemagne, elle démontre aussi la conformité avec la LVD – loi de l'Union Européenne qui assure qu'un appareil électrique avec certaines limites de voltage offre tout de même un haut niveau de protection.

CLASSES D'ISOLATION

CLASSE I

La protection n'est pas seulement basée sur l'isolation principale, mais également sur une mesure de sécurité supplémentaire constituée de la connexion des parties conductrices accessibles à un conducteur de protection (protection vers la terre) qui est rattaché à l'installation électrique fixe, de sorte que les parties conductrices accessibles ne puissent être mises sous tension en cas de panne de l'isolation principale.

CLASSE II

Les dispositifs de classe II sont conçus de sorte à ne pas avoir besoin de connexion à la terre. Ils sont fabriqués de façon à ce qu'une simple panne ne puisse causer le contact avec des tensions dangereuses de la part de l'utilisateur. Ce résultat est obtenu en fabriquant l'enveloppe du conteneur en matériau isolant, ou, en tout état de fait, en faisant en sorte que les parties sous tension soit entourées d'une double couche de matériau isolant, ou en utilisant une isolations renforcées.

CLASSE III

Un appareil est défini de Classe III lorsque sa protection contre l'électrocution est due au fait qu'aucune tension supérieure à la tension basse de sécurité SELV (Safety Extra-Low Voltage) n'est présente. Dans la pratique, cet appareil est alimenté soit par une batterie, soit par un transformateur SELV.

RÉGLEMENTATIONS TECHNIQUES

Les directives 89/336/CEE et 73/23/CEE établissent les exigences essentielles de sécurité et compatibilité électromagnétique auxquelles doivent répondre les matériaux électriques afin de pouvoir circuler librement sur le marché européen. Ces exigences doivent être vérifiées par des tests techniques appropriés et la conformité du matériau doit être indiquée par l'apposition de la marque CE sur le produit ou sur son emballage. Le marquage est obligatoire et le producteur est directement responsable de l'adéquation du produit aux exigences essentielles des directives susmentionnées. La vente, la commercialisation et l'achat de produits privés de ce marquage, et donc ne répondant pas aux directives, est puni en terme de loi.

ZONE DE SÉCURITÉ

Tous les appareils électriques sont reliés au circuit en maintenant une distance minimale de 0,60 m des lavabos, cabines de douche, baignoires et de 1,20 m des pommeaux de douche.

TÜV **ZERTIFIZIERUNGEN**

TÜV Rheinland GS ist ein Zertifikat vom Hersteller, um die Zulassung in Europa zu zertifizieren. Mit dem Nachweis voller Übereinstimmung mit der GPSG (deutsches Recht auf Sicherheitsprodukte) nicht nur für Deutschland, sondern auch in Übereinstimmung mit dem LVD, Gesetz ,der Europäischen Union zum Nachweis der Übereinstimmung, die ein elektrisches Gerät mit bestimmten Spannungsgrenzen gewährleistet, wobei ein hohes Niveau an Schutz geboten wird.

ISOLIERKLASSEN

KLASSE I

Der Schutz basiert nicht nur auf der Hauptisolation, sondern auch auf einer zusätzliche Sicherheitsmaßnahme durch die Verbindung der leitenden Teile über einem Schutzleiter (geerdet), der zur feststehenden elektrischen Installation gehört, in der Weise, dass leitfähige Teile nicht unter Spannung gesetzt werden, falls es zu einem Ausfall der Hauptisolierung kommt.

KLASSE II

Die Klasse-II-Geräte sind so konzipiert, damit sie keine Masseverbindung benötigen. Sie sind so konstruiert, dass ein einzelner Fehler nicht zum Kontakt mit gefährlichen Spannungen für den Benutzer führt. Dies wird durch die Konzeption des Behältermantels in Isoliermaterialien erreicht, oder auf andere Weise, so dass die stromführenden Teile durch eine Doppelschicht aus isolierendem Material oder durch Verwendung von verstärkter Isolierung umgeben sind.

KLASSE III

Eine Einheit ist definiert als Klasse III, wenn der Schutz gegen elektrischen Schlag auf der Tatsache beruht, dass die Spannungen nur als sehr niedrige Sicherheitsspannungen SELV (Extra Low Voltage Safety) anliegen. In der Praxis wird dies durch eine Batterie oder durch einen SELV Transformator sichergestellt.

CE **TECHNISCHE STANDARDS**

Richtlinien 89/336 / EWG und 73/23 / EWG Festlegung der grundlegenden Sicherheitsanforderungen und EMV-Anforderungen für elektrische Materialien auf dem europäischen Markt. Diese Anforderungen müssen durch geeignete technische Tests und die Konformität des Materials überprüft werden, und werden angezeigt furch das CE-Zeichen auf dem Produkt oder der Verpackung. Die Kennzeichnung ist obligatorisch und der Hersteller ist direkt verantwortlich für die Produktkonformität mit den grundlegenden Anforderungen der oben genannten Richtlinien. Der Vertrieb, Marketing und der Kauf von Produkten ohne Beschriftung ist daher nicht im Einklang mit Richtlinien und strafbar.

SICHERHEITSZONE

Alle elektrischen Geräte werden mit der Schaltung verbunden, indem ein Mindestabstand von 0,60 m von Waschbecken gehalten wird, von Duschkabinen und Badewannen und 1,20 m von Duschköpfen.
